1.-WORK IN SMALL GROUPS.YOU ARE TECHICIANS IN AN ADVERTISING COMPANY.YOU LOOK AFTER OPERATING SYSTEMS ANS SOFTWARE.LOOK AT THIS EMAIL FROM YOUR MANAGER AND DECIDE WHETEVER TO USE AN OPEN SOURCE OS, A PROPIETARY OS OR SOME OF EACH.THEN EXPLAIN YOU DECISION TO HE CLASS.

Technical Help

Peter

Technical Help

Hi peter

It is a pleasure to reply to this email.

We as technicians must help you in the best possible way:

The first free and free Operating System is:

➤ **Linux-Ubuntu Desktop**

It is a software that can be adapted from 32-bit to 64-bit without any problem, in addition to installing it manually, the software installs it with the necessary tools such as Libre Office or Firefox etc.

Figure 1-Ubuntu Desktop

We always advise Ubuntu Desktop firs because:

- It is easy to handle.
- Updates are frequent.
- Freedom of use and distribution.
- They consume very little RAM.
- They don't consume much storage.

The next option is **Cloud Ready:**

It is also a free Operating System but it is mainly focused on the cloud.

This Software, which is developed mainly for companies, offers us the following:

Figure 2-Cloud Ready

- Programs and multimedia completely online.
- All activity carried out in the Operating System is automatically saved in the cloud.
- They do not require a large storage requirement because the entire system is in the cloud.
- At the core of this Operating System is Chrome OS, that is, we have the entire Google ecosystem in this Software for free.

For the last option we recommend **Zorin OS Lite**:

- This software is more focused on giving a second life to the computer.
- Since it only needs 512 megabytes of Ram memory to work.

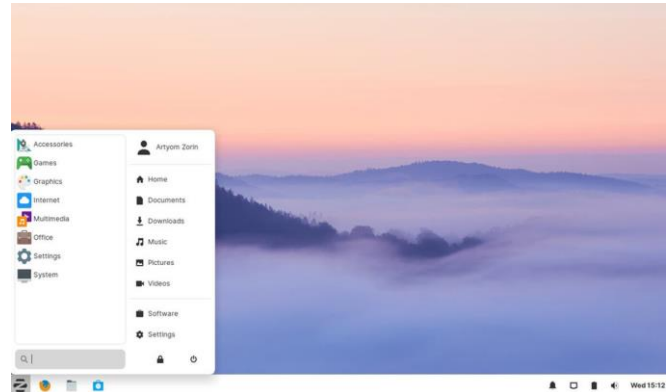

Figure 3-Zorin OS Lite

- You only need 8 gigabytes of space for installation, that is to say, any computer can get it for free.
- It is a Linux distribution that has a Windows-like interface.
- By installing the Operating System, you can have programs such as VLC, TeamViewer and Games at the same time.

Thank you for trusting us, I hope this information that we have offered you has helped you a lot.

Thanks for trusting us.

Cordial greeting.
