## REALIZACIÓN DE LA ACTIVIDAD

### 1.-WRITE THERE THE EMAIL FOR THE ACTIVITY "MULTIMEDIA HARDWARE"

Hi Ana, I am Edison and I'm going to help you.

The process is very simple, you just have to follow the following steps:

1. The first step is to take the SD card from the digital camera and insert it into the card reader as shown in the image:

Figure 1-Card reader

2. On my computer I get a message saying: A new device has been identified, where the files search software will open and we will select the OK option as shown in the image:

Figure 2-SD card

3. Having selected the Ok option, the file search **software will open** and we will **select card reader** where it will show us all the images on the SD card as shown in the image:

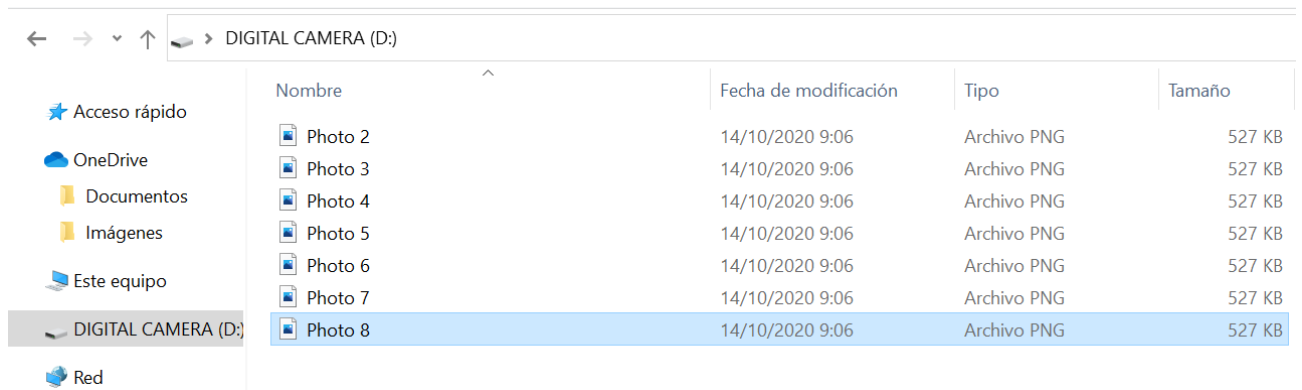

Figure 3-Photos

4. As we have already been able to see all the files, we select all the images that we want and then we will select the Copy option or in Spanish Copiar as shown in the image:

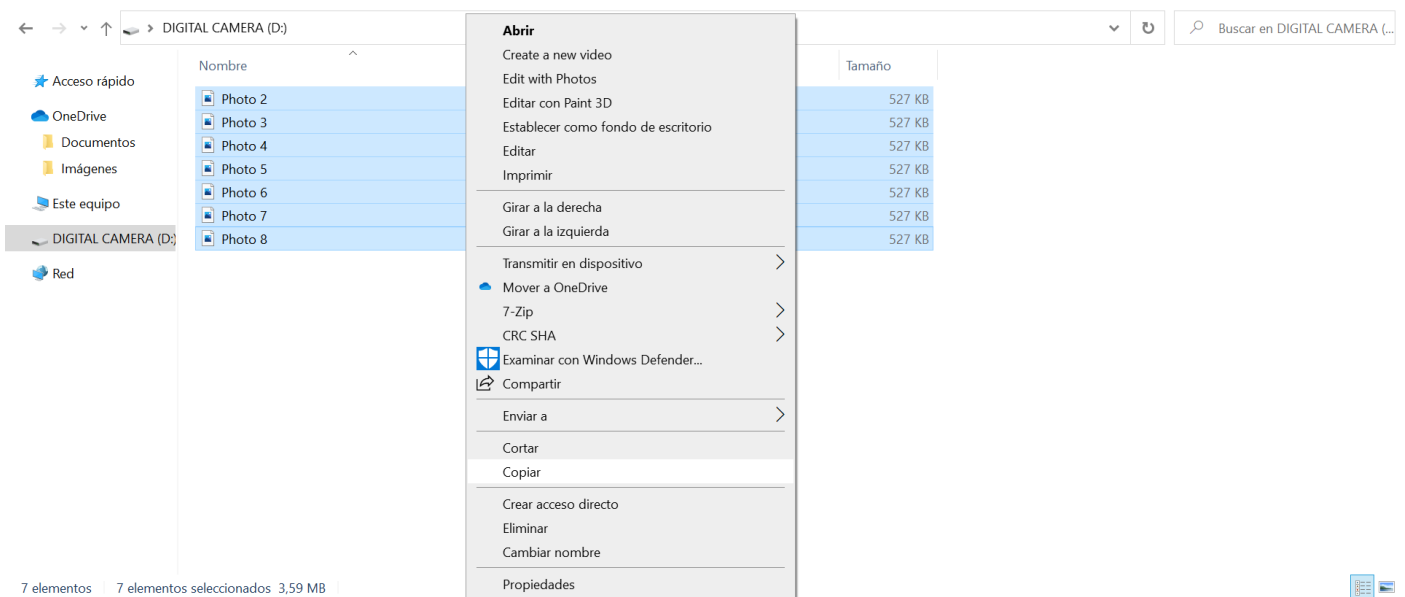

Figure 4-Copy

5. Now you must paste the images that we have previously selected to a **destination folder** which in our case is Desktop as shown in the image.

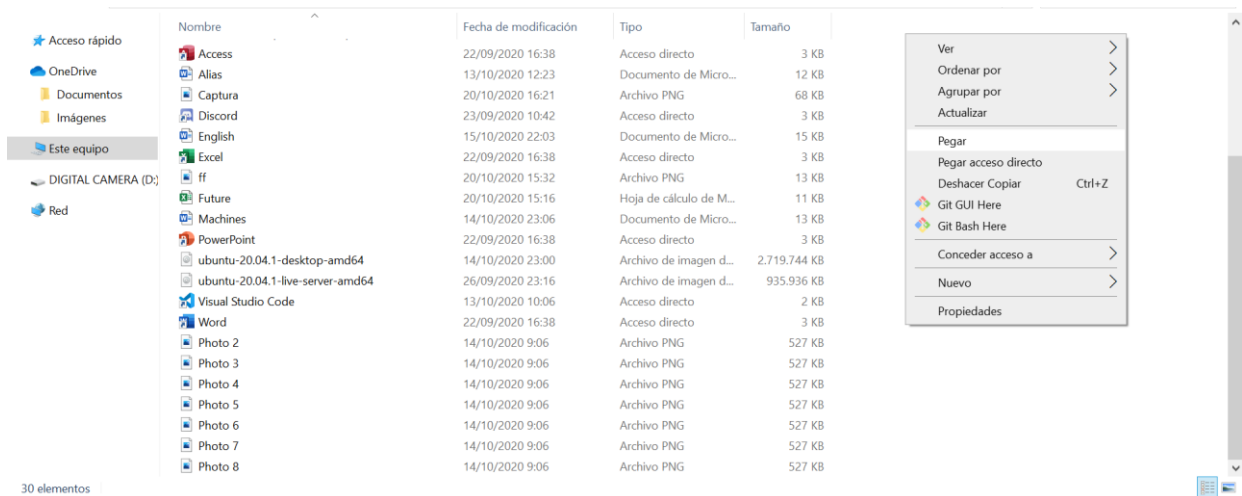

Figure 5-Files

6. As we can see the images are on the desktop of your computer:

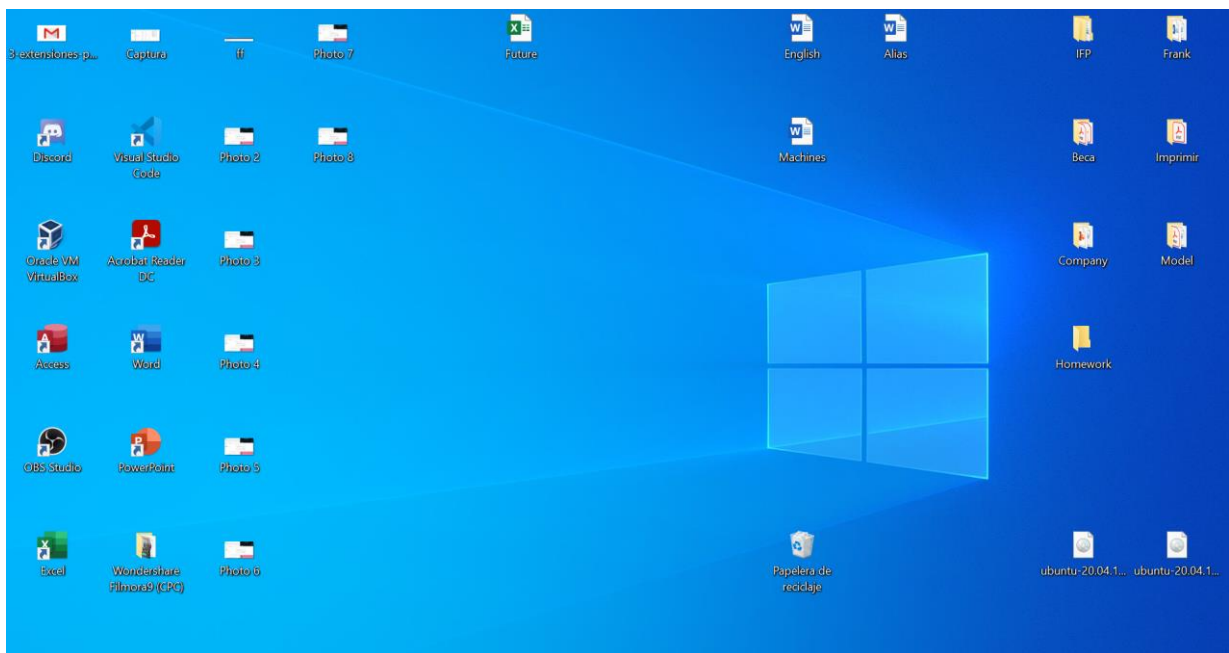

Figure 6-Desktop

Mrs. Ana Gomez if you have done the above, I am sure you have not had any problems.

It has been a pleasure to help you, a cordial greeting.
