REALIZACIÓN DE LA ACTIVIDAD:

PARAGRAPH A

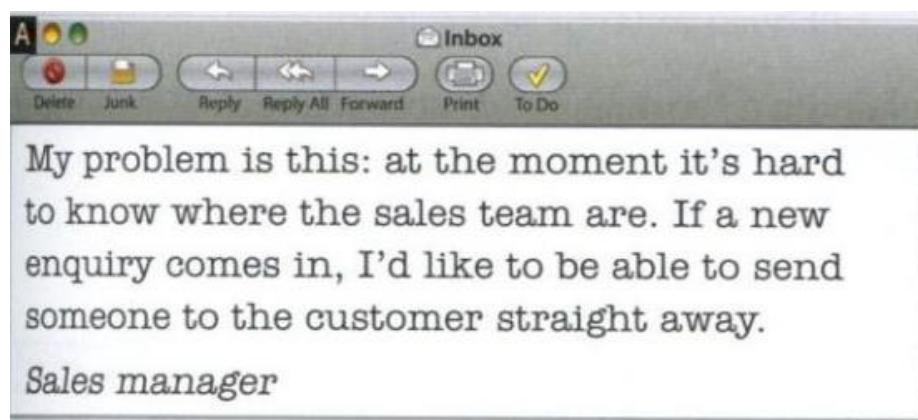

Ilustración 1-Paragraph A

The problem is that they don't have any idea where the sales team is.

The solution will be that they can put locators into their employees' cards. With this solution it will be easy to send someone that is close to a costumer.

Ilustración 2-GPS

PARAGRAPH B

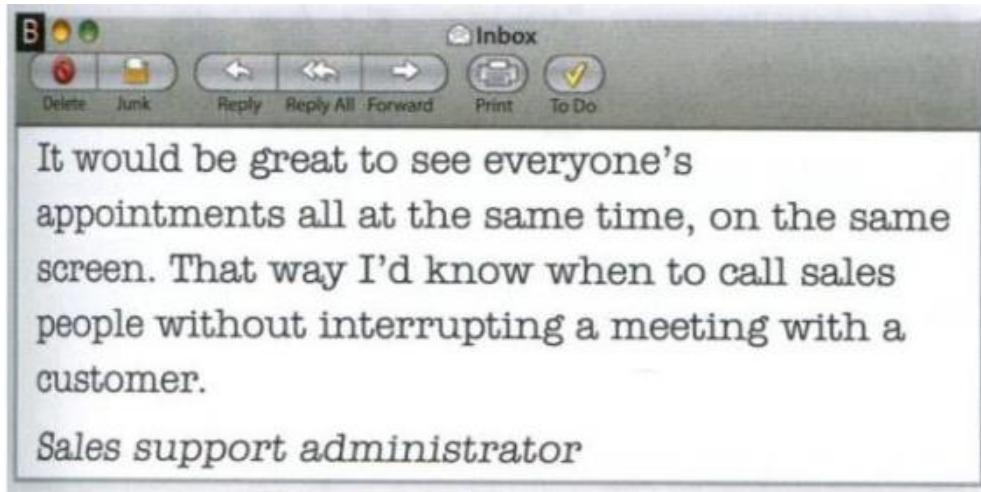

Ilustración 3-Paragraph B

The problem is that the administrator doesn't have any control of his salespeople's meetings.

The solution that I have is that the salespeople have a switch that can activate any signal on the administrator's screen. This would resolve this problem easily.

Ilustración 4-Available

Ilustración 5-Not Available

PARAGRAPH C

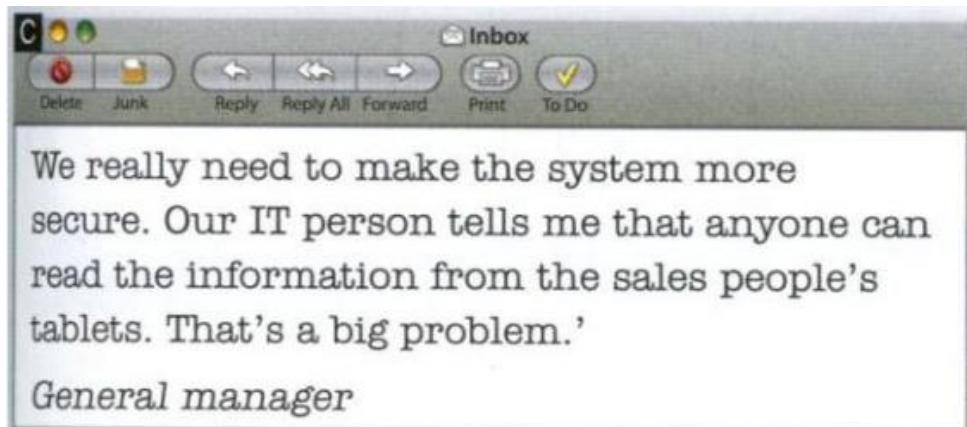

Ilustración 6-Paragraph C

The problem is that the general manager has been informed that in the salespeople's tablets anyone can read information.

My solution on this problem is that they can put a password or a biometric scan (fingerprint, voice detector...) on that tablets. With this solution, the customers or someone more cannot enter on the salespeople's tablet without the password or biometric scan.

Ilustración 7-Biometric

PARAGRAPH D

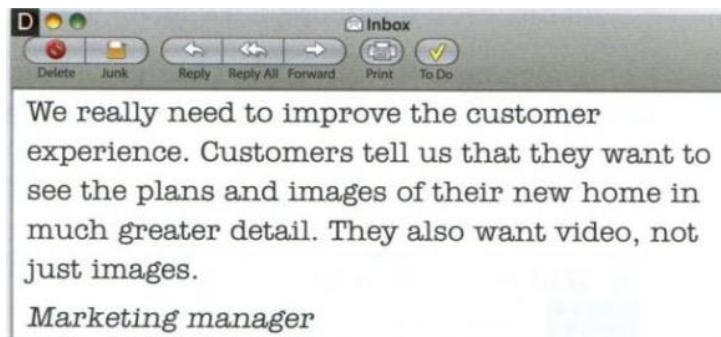

Ilustración 8-Paragraph D

One recommendation is the **Zoner Photo Studio Program.**

Because it is a Software that has its own distribution of Images and albums where we can also see the images with the best possible resolution.

Ilustración 9-Zone Photo Studio

It is software that costs \$ 50 per year but is highly recommended and even has 24-hour technical support.

As we can see in this image, we see that there is a good distribution of files and we can see in a very good way.

PARAGRAPH E

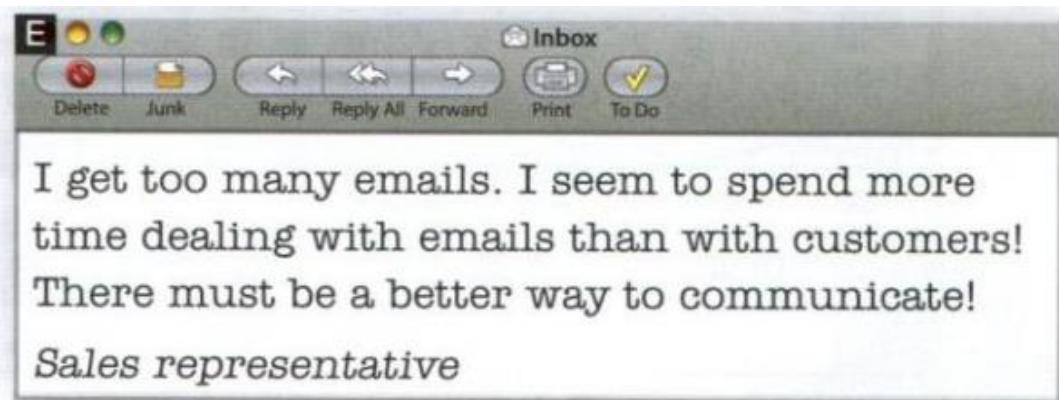

Ilustración 12-Paragraph E

The offering solution would be to have an email application like **Thunderbird**.

That allows us to better organize emails can be customized in many aspects.

And it allows us to view the mail much more quickly and clearly so that you do not have to spend so much time reviewing the emails and you can be more with the clients solving their doubts and problems.

Ilustración 14-Tools

PARAGRAPH F

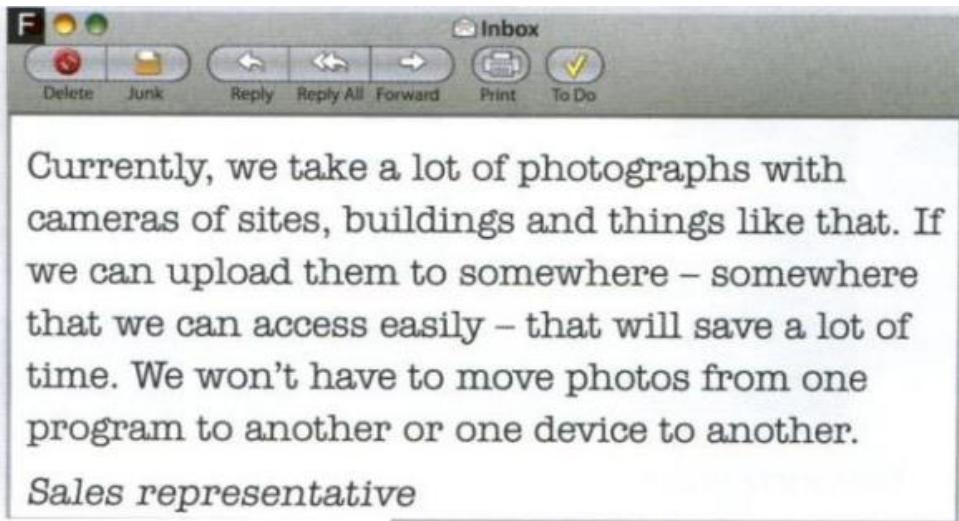

Ilustración 15-Paragraph F

The solution that i propose would be to have a private or public cloud since this way we will be able to obtain the images at the moment uploaf them,download them and they will be safe and very accessible for all of member of the company.

As pcloud is a cloud storage that give you 20gb of free initial which we can expand or cpntract them for a company.
