REALIZACIÓN DE LA ACTIVIDAD

BUSINESS MATTERS- TOP SAFETY CONSULTING

EXERCISE 5-6. LESSON 5.2 02 /02. Write here the solution for the company "Top Safety Consulting" based on the information given in the boxes (server options and CMS) and following the structure of the presentation in the listening.

Work in groups of two or individually. You will have to present the task to the rest of the class.

WRITE HERE YOUR OPTIONS (SERVER AND CMS) AND WHY YOU CHOSE THEM

Introduction:

Hello everybody, we're going to talk about my recommendation for a new website.

This website isn't very big so you don't have to spend much money in it.

For the server options, the most appropriate for you it's the second option.

For the CMS, we also recommend you the second option.

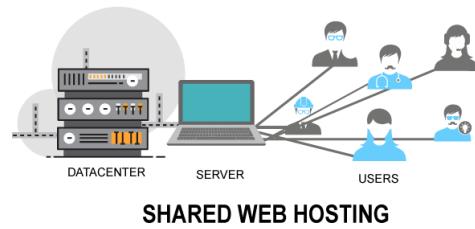

Ilustración 1-Shared Hosting

Body:

We recommended you the second server option because it cost \$34.90/month and you won't need a dedicated server for your medium-sized company.

We recommended you the second CMS option because it cost \$10/month and it gives you the mobile support that you need and the multimedia that you want to put in the website.

Conclusion:

In conclusion, we recommend you the option two in the server options and option two in CMS because we analyzed them in base of your specifications and they are the most cheaper and stable.
