## REALIZACIÓN DE LA ACTIVIDAD

Enunciado: Create a conversation between a IT technician and a client who is interested in getting some information about different issues

CHOOSE one of these topics:

- 1 -Different types of servers (dedicated, virtual...)
- 2 -Differences between open source and proprietary source
- 3 -Different types of local networks
- 4 -Firewalls
- 5 -VPN**
- 6 -Peripherals

(M) Me

(C)Client

M: Good afternoon sir, we are CyberGhost Vpn, how can we help?

C: Good afternoon, a question I would like to know about your service and what can you offer me?

M: Our company is dedicated to distributing VPNs all over the world.

C: Could you help me understand what a VPN is, please?

M: Of course there is no problem; It is a technology where you can connect to the internet from anywhere in the world.

C: I'm sorry I do not understand it.

M: An example you live in Spain but through your IP you can be in Germany for example.

C: It seems interesting but what is this for me?

M: For example if you want to access content from other countries for example USA or UK, you can also surf the web more safely and have a better chance of not being attacked by a hacker.

C: Interesting....

M: Sir then what are you going to do?

C: I think I'm going to want it.

M: Of course it is 34 euros a year, no problem?

C: 34 euros?

M: Yes sir....

C: How cheap I thought it would be more expensive.

M: Please can you give me your bank details?

C: One moment.

--5 minutes later--

M: Thank you very much for contacting us I really hope I have helped you.

C: Of course you have helped me thank you for your patience. Until next time.

M: No problem until next time.
